

M-DIVIDER MATERIAL-BAY RESTRAINING CABLE SYSTEM

ABSTRACT OF THE DISCLOSURE

5 A restraining cable and rack system comprises
material-bay dividers with cable restraints that can be
laced-through, end-attached, and adjusted to a variety of
heights on vertical bars. Long sticks or sheets of
material are stood on-end inside the bays for retail
10 display. The restraining cables are positioned to
prevent the retail material from falling out of the bays.
